

Spartan Overview

Established in 2006, Spartan Fund Management is an asset manager that specializes in providing, through pooled funds, a broad selection of alternative investment solutions that meet a variety of investment needs. We believe that niche, non conventional investment strategies tend to outperform more traditional strategies and/or add needed diversity. We also believe that alternative investment strategies provide better risk-return opportunities for investors than do conventional strategies. Spartan accesses alternative investment strategies through internal investment teams or by way of feeder fund arrangements with external registrants.

Fund Overview, Objectives and Strategy

The MM Fund invests utilizing a "core and more" approach. The core portfolio consists of sustainable high yielding or dividend paying Canadian equity securities and, to a lesser extent, real estate investment trusts, convertibles, debt securities, preferred shares and U.S. equity securities.

The "more" consists of equity and debt, plus potentially warrants, small and micro capitalization stocks, that will likely have more volatility but a higher potential for capital gains. We will focus on inexpensive secular growth securities or beaten down stocks that have turnaround potential, because of new management, or because of an improvement in their macro-economic factors. We may also look to shorter-term event driven trading opportunities around, for instance, earnings, politics, war, famine, scandal, seasonality, apathy, etc.

Investments will mostly be made in Canadian equity securities and, to a lesser extent, debt securities and U.S. equity securities. The holdings in the core portfolio will typically be held for longer periods.

NAV/Unit

- Class A	271.0730
- Class F	298.5875

¹ Performance numbers are net of management and performance fees for the period commencing July 15, 2015 for the Class F units, but do not take into account early redemption fees if investments are held less than 1 year. Returns and statistics for other classes are available on request. 'Monthly' returns are simple returns and are not annualized. 'Annualized Std. Deviation' is the standard deviation, which measures the amount of variability of returns that has historically occurred relative to the average return. 'Max. Drawdown' is the maximum percentage decline, from the highest point to the lowest point. 'Sharpe Ratio' is the Annualized Compound Return divided by the Annualized Std. Deviation, both measured since inception. 'Correlation' measures the degree to which two securities move in relation to each other.

Monthly Commentary

The S&P 500 plunged 1.8% August 2nd, after the US added a less than expected 114,000 jobs in July, the lowest print in 4 years. The unemployment rate rose to 4.3%, a 3-year high, and with consumer spending continuing to slow, markets are now on recession watch. A slowing economy means markets are now expecting that the Fed will slash rates 4 times in the autumn.

The 50bps plunge in ten-year bond yields is helping the economy even before the first Fed rate cut in four years. The \$10 fall in oil prices should also help the embattled consumer, who has been struggling with high prices, inflation, and the doubling in mortgage rates.

July saw a massive divergence between small cap stocks (+12% in July) and Nasdaq (-1.5% in July). This was hopefully a sign of things to come as this was the biggest Nasdaq underperformance since the bursting of the dot-com bubble in 2000. ½ of MM's portfolio is invested in firms with less than \$1 billion in market capitalization, which is considered small cap in the US.

The Nasdaq fell 13% in total from its July high, with some deflation of the AI bubble. The Fund was not affected by the violent gyrations in the Nasdaq, as unfortunately we sold our last mega-cap technology stock in the spring (too early!) and we have only a 4.7% information technology weight, compared to 33% for the S&P 500. The Fund also has a 10.2% fixed income position, and a 1.3% cash position, that are benefitting from the 50 bps plunge in yields over the last 2 weeks over recession fears.

The recent "Olympic" volatility is almost expected, as seasonally August and September are the weakest months for equities.

In the first half of 2024 we took profits and rotated into 11 new small and mid-capitalization stocks. We have 3 losers in the mix which is OK, as it's really the winners that drive performance: a few of our new positions are already up over 50%.

Please review the most recent offering memorandum for a detailed description of the Fund's strategy, objectives and risk factors. The above is provided for informational purposes only and is qualified in its entirety by way of the most recent offering documents, which is only available to qualified investors. Prospective investors should consult with a professional financial advisor before investing. Past performance cannot predict future results. Share value and yields will fluctuate. There can be no assurances that any of the Fund's objectives will be met. See Terms and Conditions of our website (www.spartanfunds.ca) for important information and qualifications regarding the use of benchmarking and indices. The index above was chosen as it is a widely used benchmark of the Canadian equity market. While the Fund uses this index for long-term performance comparisons, it is not managed relative to the composition of the index. There are differences which include security holdings, geographic and sector allocation which impact comparability. As a result, the Fund may experience periods when its performance differs materially from the index. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Unless otherwise indicated, rates of return for periods greater than one year are historical annual compound total returns including changes in unit or share value and reinvestment of all distributions, and do not take into account any sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The Fund is a related and connected issuer of Spartan Fund Management Inc. Spartan may act as dealer in connection with the distribution of securities of the Fund and will also receive management and performance fees from the Fund.
