

Spartan Overview

Established in 2006, Spartan Fund Management is an asset manager that specializes in providing, through pooled funds, a broad selection of alternative investment solutions that meet a variety of investment needs. We believe that niche, non conventional investment strategies tend to outperform more traditional strategies and/or add needed diversity. We also believe that alternative investment strategies provide better risk-return opportunities for investors than do conventional strategies. Spartan accesses alternative investment strategies through internal investment teams or by way of feeder fund arrangements with external registrants.

Fund Overview, Objectives and Strategy

The MM Fund invests utilizing a "core and more" approach. The core portfolio consists of sustainable high yielding or dividend paying Canadian equity securities and, to a lesser extent, real estate investment trusts, convertibles, debt securities, preferred shares and U.S. equity securities.

The "more" consists of equity and debt, plus potentially warrants, small and micro capitalization stocks, that will likely have more volatility but a higher potential for capital gains. We will focus on inexpensive secular growth securities or beaten down stocks that have turnaround potential, because of new management, or because of an improvement in their macro-economic factors. We may also look to shorter-term event driven trading opportunities around, for instance, earnings, politics, war, famine, scandal, seasonality, apathy, etc.

Investments will mostly be made in Canadian equity securities and, to a lesser extent, debt securities and U.S. equity securities. The holdings in the core portfolio will typically be held for longer periods.

NAV/Unit

- Class A	270.9962
- Class F	299.0129

¹ Performance numbers are net of management and performance fees for the period commencing July 15, 2015 for the Class F units, but do not take into account early redemption fees if investments are held less than 1 year. Returns and statistics for other classes are available on request. 'Monthly' returns are simple returns and are not annualized. 'Annualized Std. Deviation' is the standard deviation, which measures the amount of variability of returns that has historically occurred relative to the average return. 'Max. Drawdown' is the maximum percentage decline, from the highest point to the lowest point. 'Sharpe Ratio' is the Annualized Compound Return divided by the Annualized Std. Deviation, both measured since inception. 'Correlation' measures the degree to which two securities move in relation to each other.

Monthly Commentary

In September the Fed cut rates for the first time in 4 ½ years, and the first-rate cut was a bazooka 50 bps. Long-term bond yields did not fall as expected with the 50bps September rate cut, suggesting that the Fed was too aggressive in easing and that there are still inflation concerns lingering.

This premise was confirmed by the September job report that blew away expectations, with 254K new jobs, 100,000 more than expected. Suspiciously, one month before the election, most of the new jobs were government jobs. The blowout jobs came with inflationary wage increases of +0.4% in the month, or 4.8% annualized.

The S&P 500 surged 0.9% on Friday's strong job report, accompanied by an 11 bps rise in bond yields, to 3.96%. Rising bond yields are a worry as US debt hit an unfathomable \$36 trillion. Yields are now up 40 bps in the weeks following the September rate cut.

Oil producers fell sharply in September, in concert with the price of oil, but interestingly the Fund experienced a nice bump from a natural gas producer, energy services companies, and pipelines. Gold

companies continue to benefit from record gold prices. Additionally, the Fund saw strong performance in two holdings - one that specializes in electrical transformers and another that focuses on carbon emissions reduction in the energy services sector.

Given that there are unfortunately no prospects for peace in the two hot wars currently under way, and the drama around the US election, we continue to believe a 9.3% gold weight, and a 25.1% energy weight are prudent. The gold weight includes "picks and shovels" companies servicing the gold sector. Also 9.3% is invested in high yield bonds, and 1.2% is in cash, where we are "paid to wait".

Our energy position has helped us so far in October, as oil prices surged to over \$75, on fears the Israel war would expand to Iran.

We also have 3 risk arbitrage positions, that have an uncorrelated risk profile and will likely pay out in coming weeks.

Please review the most recent offering memorandum for a detailed description of the Fund's strategy, objectives and risk factors. The above is provided for informational purposes only and is qualified in its entirety by way of the most recent offering documents, which is only available to qualified investors. Prospective investors should consult with a professional financial advisor before investing. Past performance cannot predict future results. Share value and yields will fluctuate. There can be no assurances that any of the Fund's objectives will be met. See Terms and Conditions of our website (www.spartanfunds.ca) for important information and qualifications regarding the use of benchmarking and indices. The index above was chosen as it is a widely used benchmark of the Canadian equity market. While the Fund uses this index for long-term performance comparisons, it is not managed relative to the composition of the index. There are differences which include security holdings, geographic and sector allocation which impact comparability. As a result, the Fund may experience periods when its performance differs materially from the index. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Unless otherwise indicated, rates of return for periods greater than one year are historical annual compound total returns including changes in unit or share value and reinvestment of all distributions, and do not take into account any sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The Fund is a related and connected issuer of Spartan Fund Management Inc. Spartan may act as dealer in connection with the distribution of securities of the Fund and will also receive management and performance fees from the Fund.
