

Spartan Overview

Established in 2006, Spartan Fund Management is an investment fund manager that specializes in providing a broad selection of alternative investment solutions that meet a variety of investment needs. We believe that niche, non-conventional investment strategies tend to outperform more traditional strategies and/or add needed diversification. We also believe that alternative investment strategies provide better risk-return opportunities for investors than do conventional strategies. Spartan accesses alternative investment strategies either through internal investment teams or by way of feeder funds that invest in existing funds that are managed by external fund managers.

Fund Overview, Objectives and Strategy

The MM Fund invests utilizing a "core and more" approach. The core portfolio consists of sustainable high yielding or dividend paying Canadian equity securities and, to a lesser extent, real estate investment trusts, convertibles, debt securities, preferred shares and U.S. equity securities.

The "more" consists of equity and debt, plus potentially warrants, small and micro capitalization stocks, that will likely have more volatility but a higher potential for capital gains. We will focus on inexpensive secular growth securities or beaten down stocks that have turnaround potential, because of new management, or because of an improvement in their macro-economic factors. We may also look to shorter-term event driven trading opportunities around, for instance, earnings, politics, war, famine, scandal, seasonality, apathy, etc.

Investments will mostly be made in Canadian equity securities and, to a lesser extent, debt securities and U.S. equity securities. The holdings in the core portfolio will typically be held for longer periods.

NAV/Unit

- Class A 438.5483
 - Class F 487.8271

¹ Performance numbers are net of management and performance fees for the period commencing July 15, 2015 for the Class F units, but do not take into account early redemption fees if investments are held less than 1 year. Returns and statistics for other classes are available on request. 'Monthly' returns are simple returns and are not annualized. 'Annualized Std. Deviation' is the standard deviation, which measures the amount of variability of returns that has historically occurred relative to the average return. 'Max. Drawdown' is the maximum percentage decline, from the highest point to the lowest point. 'Sharpe Ratio' is the Annualized Compound Return divided by the Annualized Std. Deviation, both measured since inception. 'Correlation' measures the degree to which two securities move in relation to each other.

Monthly Commentary

The U.S. Institute for Supply Management (ISM) Manufacturing Index zoomed up 4.7 points in January to 52.6, marking its first move above 50 in almost a year. New orders, new export orders, and order backlogs all shifted from contraction to expansion. These developments suggest that tariffs and Trump's pressure to reshore production are finally gaining traction.

We look forward to the thoughtful, erudite and intellectual rigor Kevin Warsh will likely bring to Federal Reserve (Fed) meetings, along with some much-needed straight talk. Warsh was mentored by the legendary hedge fund manager Stan Druckenmiller along with Treasury Secretary Scott Bessent, a background that suggests that there could be a higher degree of alignment between the Treasury and Federal Reserve.

In 2023, Warsh wrote:

"History will give a full accounting of the grave errors committed in recent years in economic policy. A central lesson is already clear: Nothing is as expensive as free money. The costs of the Federal Reserve's zero-interest policy are multiplying: The misallocation of capital—goosing the price of the riskiest and least-productive of assets—set the conditions for boom and bust. The financing of the 'big state' set the country on an unsustainable fiscal trajectory. The extraordinarily loose financial conditions created herd behavior among market participants and firms and complacency among policy makers, including regulators. The surge in inflation substantially raised the cost of living for citizens and undermined business planning."

He has been a vocal critic of the Powell/Yellen Fed. On May 29th, 2025, Warsh stated:

"The Fed seeks to fix interest rates and control foreign-exchange rates simultaneously—an impossible task with the free flow of capital. Its 'forward guidance,' promising low interest rates well into the future, offers ambiguity in the name of clarity. It licenses a cacophony of communications in the name of transparency. And it expresses grave concern about income inequality while refusing to acknowledge that its policies unfairly increased asset inequality."

The leadership of the market appears to be changing, as the Dow Jones hit an all-time high of 50,000, even as the Magnificent 7 ETF is still down -5% from its February 6th peak. The MM Fund has no exposure to the giant Magnificent 7 technology stocks, and just 6.8% exposure to technology overall, compared with 34.4% for the S&P 500.

The Fund benefited from broad-based advances in January, led by the materials sector, lifting performance to +8.26%, compared with +0.84% for the TSX Composite. This level of outperformance hasn't only been exhibited in recent months, but throughout the Fund's life. Since its inception in July 2015, MM Fund has outperformed the TSX Composite by +188.77%.

Please review the most recent offering memorandum for a detailed description of the Fund's strategy, objectives and risk factors. The above is provided for informational purposes only and is qualified in its entirety by way of the most recent offering documents, which is only available to qualified investors. Prospective investors should consult with a professional financial advisor before investing. Past performance cannot predict future results. Share value and yields will fluctuate. There can be no assurances that any of the Fund's objectives will be met. See Terms and Conditions of our website (www.spartanfunds.ca) for important information and qualifications regarding the use of benchmarking and indices. The index above was chosen as it is a widely used benchmark of the Canadian equity market. While the Fund uses this index for long-term performance comparisons, it is not managed relative to the composition of the index. There are differences which include security holdings, geographic and sector allocation which impact comparability. As a result, the Fund may experience periods when its performance differs materially from the index. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Unless otherwise indicated, rates of return for periods greater than one year are historical annual compound total returns including changes in unit or share value and reinvestment of all distributions, and do not take into account any sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The Fund is a related and connected issuer of Spartan Fund Management Inc. Spartan may act as dealer in connection with the distribution of securities of the Fund and will also receive management and performance fees from the Fund.
